**NOTICE OF CANCELLATION OF THE PROCEDURE**  
**Procedure No. 04/2026**

Gdańsk, 16 June 2026

The Contracting Authority – the Polish Lymphoma Research Group – hereby announces the cancellation of procedure No. 04/2026 concerning the provision of services consisting in making available a platform for the central assessment of PET/CT scans and performing interpretations of imaging examinations for the purposes of the non-commercial clinical trial: “Efficacy and Tolerability of N-AVD compared to BrECADD in patients with advanced Hodgkin Lymphoma (N-BRAVE)”, protocol No.: PLRG-HL05, EU CT: 2026-525263-41-00, financed from the state budget as part of funding granted by the Medical Research Agency.

The reason for the cancellation is a breach of the principle of equal treatment of Contractors. In the course of the procedure, it was found that one of the offers submitted by a Contractor in response to the request for proposals had been automatically classified as spam by the Contracting Authority’s email system and, consequently, had not been read before the deadline for submission of offers.

The above means that the procedure was conducted in a manner which, although unintentional, prevented one of the Contractors from effectively participating in the tender process. In the opinion of the Contracting Authority, continuing the procedure and selecting an offer under these circumstances would be contrary to the principles of competitiveness, transparency and equal treatment, which the Contracting Authority is obliged to observe due to the project being financed with funds from the Medical Research Agency.

In connection with the cancellation of the procedure, the information on the opening and selection of the offer dated 9 June 2026 is no longer valid, and the selection of the Contractor made therein shall have no further effect.

The Contracting Authority plans to re-initiate the procedure and will inform about further actions concerning the subject matter of the contract in a separate announcement.

.....  
President of the Polish Lymphoma Research Group  
Prof. Jan Maciej Zaucha, MD, PhD, DSc
